

February 10, 2020

Hello,

I am the Office Manager for Informed Systems, where Wes Hedrick was employed as an Application Consultant from July, 2019 to October, 2019. Based upon my interaction with Wes, I highly recommend him for a position which would utilize his technical, organizational and communication skills.

In his role as Application Consultant, Wes provided training and technical support for Dynamics GP users. He was a team player and worked well with our other consultants to troubleshoot challenging issues. With limited accounting background, Wes took the initiative to study and learn basic accounting principles in order to understand client questions. He also sought out instructional materials to expand his technical skill set. This desire to learn translated to a steady increase in billable hours each month.

As a small office, we all work together to ensure success. Wes was always willing to step in wherever assistance was needed. He seems to be a natural teacher, and we received positive client feedback regarding his patience.

Finally, Wes' integrity is beyond reproach. He has a strong desire to always do the right thing. He works hard and seems to really want to succeed.

Should you have any questions, feel free to contact me by phone or email.

Sincerely,

A handwritten signature in cursive script that reads 'Betsy Brycki'.
